

I received notice that Low Power FM frequencies may be allowed to take priority over current FM translator services, which include K-Love radio frequencies. I think that this would be a huge mistake. K-Love Radio stations provide people with a message of encouragement in the midst of a world that is filled with materialism and superficiality. K-Love serves the Memphis area as the only Christian radio station that is available, and was exactly what I needed in a transitional period of my life. I know that keeping K-Love on the air is in the greater interest of the public, because their purpose as a radio broadcast is to serve others and offer encouragement.
